

For small to medium-sized businesses, Alliance Computer Services offers customer-focused information technology management going beyond simple break/fix services to help people in business get the most from their technology systems. Our goal is to build your business through technology consulting and services that best suit your needs. Your success is our success.

The company also offers a complete line of software as a service including email spam filtering, online backup, Microsoft Exchange hosting, and anti-virus protection. Founded in 2001 in Milford, Michigan, Alliance Computer Services has on staff Microsoft Certified Professionals.

Alliance Computer Services continues to grow its business with education on the latest information technology techniques, responsive 24/7 computer repair, and valuable partners.

We are proud of our community involvement including membership in the Huron Valley Chamber of Commerce.
